

**PROTECTION OF BIOLOGICAL
AND LANDSCAPE DIVERSITY
IN AGRICULTURAL LANDSCAPES
OF CENTRAL AND EASTERN EUROPE**

Nature and environment, No. 94

Table of contents

1.	INTRODUCTION	5
1.1.	Object of the study	5
1.2.	Information used for the study and difficulties encountered	5
1.3.	Aim of the study	6
2.	PHYSIOGRAPHIC BACKGROUND FOR THE LANDSCAPE AND BIOLOGICAL DIVERSITY	7
3.	POLITICAL, ECONOMICAL AND DEMOGRAPHIC CHARACTERISTICS IMPORTANT FOR MAINTENANCE OF LANDSCAPE AND BIOLOGICAL DIVERSITY IN AGRICULTURAL LANDSCAPES OF CENTRAL AND EASTERN EUROPE	11
4.	DIVERSITY OF MAIN LAND-USE FORMS IN THE CEEC	13
5.	CHARACTERISTICS OF AGRICULTURE IMPORTANT FOR LANDSCAPE AND BIOLOGICAL DIVERSITY MAINTENANCE	15
6.	TRANSITION OF AGRICULTURE IN THE CENTRAL AND EASTERN EUROPE	17
7.	THREATS TO LANDSCAPE AND BIOLOGICAL DIVERSITY	20
7.1.	Impact of political system on landscape diversity - case study: Estonia, Latvia and Lithuania	20
7.2.	Radioactive threat to biological and landscape diversity - case study of the Chernobyl catastrophe	23
7.3.	Impact of industrialized agriculture on landscapes case study Ukraine	24
7.4.	Conversion of natural vegetation by man exploitation	25
7.5.	Impact of industrial pollution on landscape diversity - the "black triangle" case study	28
8.	TOURISM IMPACT ON LANDSCAPE AND BIOLOGICAL DIVERSITY	30
9.	STATE OF LANDSCAPE PROTECTION	33
10.	CLOSING REMARKS	37
11.	REFERENCES	40
