V.L. K. 300/304

FIFTH EDITION

Environmental Science

Earth as a
Living Planet

Botkin • Keller

Brief Contents

- 1 * *Key Themes in Environmental Sciences* 1
- 2 * *Science as a Way of Knowing: Critical Thinking About the Environment* 15
- 3 * *The Big Picture: Systems of Change* 35
- 4 * *The Human Population and the Environment* 52
- 5 * *The Biogeochemical Cycles* 72
- 6 * *Ecosystems and Ecosystem Management* 97
- 7 * *Biological Diversity* 112
- 8 * *Biogeography* 135
- 9 * *Biological Productivity and Energy Flow* 161
- 10 * *Ecological Restoration* 175
- 11 * *Producing Enough Food for the World: How Agriculture Depends on the Environment* 193
- 12 * *Effects of Agriculture on the Environment* 217
- 13 * *Forests, Parks, and Landscapes* 239
- 14 * *Wildlife, Fisheries, and Endangered Species* 262
- 15 * *Environmental Health, Pollution, and Toxicology* 294
- 16 * *Energy: Some Basics* 319
- 17 * *Fossil Fuels and the Environment* 337
- 18 * *Alternative Energy and the Environment* 358
- 19 * *Nuclear Energy and the Environment* 380
- 20 * *Water Supply, Use, and Management* 404
- 21 * *Water Pollution and Treatment* 435
- 22 * *The Atmosphere, Climate, and Global Warming* 466
- 23 * *Air Pollution* 502
- 24 * *Indoor Air Pollution* 533
- 25 * *Ozone Depletion* 549
- 26 * *Minerals and the Environment* 568
- 27 * *Dollars and Environmental Sense: Economics of Environmental Issues* 582
- 28 * *Urban Environments* 601
- 29 * *Waste Management* 624
- 30 * *Imagine a Sustainable Future* 650

Contents

1 Key Themes in Environmental Sciences 1

Case Study • **Shrimp, Mangroves, and Pickup Trucks: Local and Global Connections Reveal Major Environmental Concerns** 2

1.1 • **Major Themes of Environmental Science** 3

1.2 • **Human Population Growth** 3

The John Eli Miller Family 3

A Closer Look 1.1 • **A Little Environmental History** 4

Our Rapid Population Growth 4

African Famines 5

A Closer Look 1.2 • **The Black Death** 6

1.3 • **An Urban World** 7

1.4 • **Sustainability and Carrying Capacity** 8

Defining Sustainability 8

Carrying Capacity of the Earth 8

A Closer Look 1.3 • **Carrying Capacity of the Chinook Salmon** 9

1.5 • **People and Nature** 9

1.6 • **A Global Perspective** 10

1.7 • **Science and Values** 11

Placing a Value on the Environment 11

Critical Thinking Issue • **How Can We Preserve the World's Coral Reefs?** 12

Summary 13

REEXAMINING THEMES AND ISSUES 13 • KEY TERMS 14

STUDY QUESTIONS 14 • FURTHER READING 14

2 Science as a Way of Knowing: Critical Thinking About the Environment 15

Case Study • **Birds at Mono Lake: Applying Science to Solve an Environmental Problem** 16

2.1 • **Understanding What Science Is (and What it Isn't)** 17

Science as Process 17

Disprovability 17

A Closer Look 2.1 • **A Brief History of Science** 18

Assumptions of Science 19

A Closer Look 2.2 • **The Case of the Mysterious Crop Circles** 20

The Nature of Scientific Proof 20

2.2 • **Measurements and Uncertainty** 22

A Word about Numbers in Science 22

Dealing with Uncertainties 22

A Closer Look 2.3 • **Measurement of Carbon Stored in Vegetation** 23

Accuracy and Precision 23

2.3 • **Observations, Facts, Inferences, and Hypotheses** 24

2.4 • **A Word about Creativity and Critical Thinking** 26

2.5 • **Misunderstandings about Science** 26

Theory in Science and Language 26

Science and Technology 26

Science and Objectivity 27

Science, Pseudoscience, and Frontier Science 27

2.6 • **Environmental Questions and the Scientific Method** 28

An Example: The California Condor 28

Some Alternatives to Direct Experimentation 29

Modern Catastrophes and Disturbances as Experiments 29

2.7 • **Science and Decision Making** 30

2.8 • **Learning about Science** 30

A Closer Look 2.4 • **Evaluating Media Coverage** 31

2.9 • **Science and Media Coverage** 31

Summary 31

Critical Thinking Issue • **How Do We Decide What to Believe about Environmental Issues?** 32

REEXAMINING THEMES AND ISSUES 33 • KEY TERMS 33

STUDY QUESTIONS 33 • FURTHER READING 34

3 The Big Picture: Systems of Change 35

Case Study • **Amboseli National Park** 36

3.1 • **Systems and Feedback** 38

System Defined 38

Feedback 38

3.2 • **Exponential Growth** 40

Working it Out 3.1 41

3.3 • **Environmental Unity** 41

An Urban Example 42

A Forest Example 42

3.4 • Uniformitarianism 42

3.5 • Changes and Equilibrium in Systems 43

Working it Out 3.2 44

3.6 • Earth and Life 46

3.7 • Earth as a Living System 46

3.8 • Ecosystems 46

The Gaia Hypothesis 47

The Nature of Ecosystems 47

3.9 • Why Solving Environmental Problems Is Often Difficult 48

Critical Thinking Issue • Is the Gaia Hypothesis Science? 49

Summary 49

REEXAMINING THEMES AND ISSUES 50 • KEY TERMS 51

STUDY QUESTIONS 51 • FURTHER READING 51

4 *The Human Population and the Environment* 52

Case Study • Death in Bangladesh 53

4.1 • How Populations Change Over Time: Basic Concepts of Population Dynamics 54

Age Structure 54

Working it Out 4.1 55

4.2 • Kinds of Population Growth 56

Exponential Growth 56

A Closer Look 4.1 • Growth of the Human Population 57

A Brief History of Human Population Growth 57

4.3 • Present Human Population Rates of Growth 57

A Closer Look 4.2 • How Many People Have Lived on Earth? 59

4.4 • Projecting Future Population Growth 60

Exponential Growth and Doubling Time 60

The Logistic Growth Curve 60

Forecasting Human Population Growth Using the Logistic Curve 61

4.5 • The Demographic Transition 61

4.6 • Population and Technology 62

A Closer Look 4.3 • The Prophecy of Malthus 63

4.7 • The Human Population, the Quality of Life, and the Human Carrying Capacity of Earth 63

Potential Effects of Medical Advances on Demographic Transition 64

Human Death Rates and the Rise of Industrial Societies 64

Longevity and its Effect on Population Growth 66

4.8 • Limiting Factors 66

Basic Concepts 66

Life Expectancy 66

4.9 • How Can We Achieve Zero Population Growth? 67

Age of First Childbearing 67

Birth Control: Biological and Societal 67

National Programs to Reduce Birth Rates 67

Critical Thinking Issue • How Many People Can Earth Support? 68

Summary 69

REEXAMINING THEMES AND ISSUES 69 • KEY TERMS 70

STUDY QUESTIONS 70 • FURTHER READING 71

5 *The Biogeochemical Cycles* 72

Case Study • Lake Washington 73

5.1 • How Chemicals Cycle 74

Biogeochemical Cycles 74

Chemical Reactions 74

A Closer Look 5.1 • Matter and Energy 75

5.2 • Environmental Questions and Biogeochemical Cycles 77

A Closer Look 5.2 • A Biogeochemical Cycle 78

5.3 • Biogeochemical Cycles and Life: Limiting Factors 78

5.4 • General Concepts Central to Biogeochemical Cycles 79

5.5 • The Geologic Cycle 80

The Tectonic Cycle 80

The Hydrologic Cycle 82

The Rock Cycle 83

5.6 • Biogeochemical Cycling in Ecosystems 84

Ecosystem Cycles of a Metal and a Nonmetal 85

Chemical Cycling and the Balance of Nature 86

5.7 • Some Major Global Chemical Cycles 86

The Carbon Cycle 87

A Closer Look 5.3 • Photosynthesis and Respiration 88

The Nitrogen Cycle 91

The Phosphorous Cycle 92

Critical Thinking Issue • How Are Human Activities Affecting the Nitrogen Cycle? 94

Summary 94

REEXAMINING THEMES AND ISSUES 95 • KEY TERMS 96

STUDY QUESTIONS 96 • FURTHER READING 96

6 *Ecosystems and Ecosystem Management* 97

Case Study • The Acorn Connection 98

6.1 • The Ecosystem: Sustaining Life on Earth 100

Basic Characteristics of Ecosystems 100

Ecological Communities and Food Chains 100

A Closer Look 6.1 • Hot Spring Ecosystems in Yellowstone National Park 101

6.2 • The Community Effect 104

6.3 • How Do You Know When You Have Found an Ecosystem? 107

6.4 • Ecosystem Management 108

Summary 108

Critical Thinking Issue • How Are the Borders of an Ecosystem Defined? 109

7 Biological Diversity 112

Case Study * The Shrinking Mississippi Delta 113

7.1 * What Is Biological Diversity? 114

7.2 * Biological Evolution 114

Mutation 115

Natural Selection 115

Geographic Isolation and Migration 116

A Closer Look 7.1 * Natural Selection: Mosquitoes and the Malaria Parasite 117

Genetic Drift 118

Evolution as a Game 118

7.3 * Basic Concepts of Biological Diversity 118

7.4 * The Evolution of Life on Earth 120

7.5 * The Number of Species on Earth 122

7.6 * Why Are There So Many Species? 123

Interactions between Species 123

The Competitive Exclusion Principle 123

7.7 * Niches: How Species Coexist 124

Professions and Places: The Ecological Niche and the Habitat 127

Measuring Niches 127

Symbiosis 128

Predation and Parasitism 128

7.8 * Environmental Factors that Influence Diversity 129

7.9 * Genetic Engineering and Some New Issues about Biological Diversity 131

Environmental Issues as Information Issues 131

Critical Thinking Issue * Why Preserve Biodiversity? 132

Summary 133

REEXAMINING THEMES AND ISSUES 133 * KEY TERMS 134

STUDY QUESTIONS 134 * FURTHER READING 134

8 Biogeography 135

Case Study * Too Much of a Good Thing: The Invasion of the Purple Loosestrife 136

8.1 * Why Were Introductions of New Species into Europe So Popular Long Ago? 137

8.2 * Wallace's Realms: Biotic Provinces 137

8.3 * Biomes 138

8.4 * Geographic Patterns of Life within a Continent 142

A Closer Look 8.1 * A Biogeographical Cross Section of North America 143

8.5 * Island Biogeography 144

8.6 * Biogeography and People 145

8.7 * Earth's Biomes 147

8.8 * The Geography of Life on the Planet Earth 149

Tundra 149

Taiga, or Boreal Forests 150

Temperate Deciduous Forests 150

Temperate Rain Forests 151

Temperate Woodlands 151

Temperate Shrublands 151

Temperate Grasslands 152

Tropical Rain Forests 153

Tropical Seasonal Forests and Savannas 153

Deserts 153

Wetlands 154

Freshwaters 154

Intertidal Areas 155

Open Ocean 156

Benthos 156

Upwellings 156

Hydrothermal Vents 156

Summary 156

Critical Thinking Issue * Escape of an Exotic Species 157

REEXAMINING THEMES AND ISSUES 158 * KEY TERMS 159

STUDY QUESTIONS 159 * FURTHER READING 160

9 Biological Productivity and Energy Flow 161

Case Study * Harvesting Forests in Michigan and England 162

9.1 * How Much Can We Grow? 163

9.2 * Biological Production 163

Two Kinds of Biological Production 163

Working It Out 9.1 164

Working It Out 9.2 165

Gross and Net Production 165

9.3 * Energy Flow 166

Working It Out 9.3 167

9.4 * The Ultimate Limit on the Abundance of Life 167

The Laws of Thermodynamics 167

Energy Efficiency and Transfer Efficiency 168

A Closer Look 9.1 * The Second Law of Thermodynamics 169

A Closer Look 9.2 * Ecological Efficiencies 170

9.5 * Some Examples of Energy Flow 170

Energy Flow in an Old-Field Food Chain 170

Energy Flow in a Stream or River 170

Critical Thinking Issue * Should People Eat Lower on the Food Chain? 171

Energy Flow in Ocean Ecosystems 172

Chemosynthetic Energy Flow in the Ocean 172

Summary 172

REEXAMINING THEMES AND ISSUES 173 * KEY TERMS 173

STUDY QUESTIONS 173 * FURTHER READING 174

Ecological Restoration 175

Case Study * Restoring a Ponderosa Forest 176

10.1 * Restore to What? 177

The Balance of Nature 177

The Boundary Waters Canoe Area Wilderness: An Example of the Naturalness of Change 178

Goals of Restoration: What Is "Natural"? 178

10.2 • What Needs to Be Restored? 179

Wetlands, Rivers, and Streams 179

Prairie Restoration 180

10.3 • When Nature Restores Itself: The Process of Ecological Succession 180

Patterns in Succession 180

A Closer Look 10.1 • An Example of Forest Secondary Succession 182

General Patterns of Succession 183

10.4 • Succession and Chemical Cycling 184

A Closer Look 10.2 • Changes in Chemical Cycling During a Disturbance 186

10.5 • Species Change in Succession: Do Early Successional Species Prepare the Way for Later Ones? 187

Facilitation 187

Interference 187

Critical Thinking Issue • How Can We Evaluate Constructed Ecosystems? 188

Life History Differences 189

Chronic Patchiness 189

10.6 • Applying Ecological Knowledge to Restore Heavily Damaged Lands and Ecosystems 190

Summary 190

REEXAMINING THEMES AND ISSUES 191 • KEY TERMS 191

STUDY QUESTIONS 191 • FURTHER READING 192

Producing Enough Food for the World: How Agriculture Depends on the Environment 193

Case Study • Food for China 194

11.1 • Can We Feed the World? 195

11.2 • How We Starve 197

11.3 • What We Eat and What We Grow 199

Crops 199

Aquaculture 201

11.4 • An Ecological Perspective on Agriculture 202

11.5 • Limiting Factors 204

11.6 • The Future of Agriculture 204

A Closer Look 11.1 • Traditional Farming Methods 206

11.7 • Increasing the Yield per Acre 207

The Green Revolution 207

Improved Irrigation 207

11.8 • Organic Farming 207

11.9 • Alternatives to Monoculture 207

A Closer Look 11.2 • Potential Future Advances in Agriculture 208

11.10 • Eating Lower on the Food Chain 209

11.11 • Genetically Modified Food: Biotechnology, Farming, and Environment 211

11.12 • Climate Change and Agriculture 213

Critical Thinking Issue • Will There Be Enough Water to Produce Food for a Growing Population? 212

Summary 214

REEXAMINING THEMES AND ISSUES 214 • KEY TERMS 215

STUDY QUESTIONS 215 • FURTHER READING 216

Effects of Agriculture on the Environment 217

Case Study • Clean-Water Farms 218

12.1 • How Agriculture Changes the Environment 219

12.2 • The Plow Puzzle 219

12.3 • Our Eroding Soils 219

12.4 • Where Eroded Soil Goes: Sediments Also Cause Environmental Problems 221

A Closer Look 12.1 • Soils 222

Making Soils Sustainable 223

Contour Plowing 223

No-Till Agriculture 223

12.5 • Controlling Pests 224

12.6 • The History of Pesticides 224

12.7 • Integrated Pest Management 225

Monitoring Pesticides in the Environment 227

12.8 • Genetically Modified Crops 227

A Closer Look 12.2 • DDT 228

New Hybrids 229

The Terminator Gene 229

Transfer of Genes from One Major Form of Life to Another 229

12.9 • Grazing on Rangelands: An Environment Benefit or Problem? 230

Traditional and Industrialized Use of Grazing and Rangelands 231

The Biogeography of Agricultural Animals 231

Carrying Capacity of Grazing Lands 232

12.10 • Desertification: Regional Effects and Global Impact 232

What Causes Deserts? 233

Preventing Desertification 233

Critical Thinking Issue • Should Rice Be Grown in a Dry Climate? 234

12.11 • Does Farming Change the Biosphere? 235

Summary 236

REEXAMINING THEMES AND ISSUES 236 • KEY TERMS 237

STUDY QUESTIONS 237 • FURTHER READING 238

13 Forests, Parks, and Landscapes 239

Case Study • Conserving Wetland Forests at the Mouth of the Mississippi 240

13.1	The Landscape Concept	242
13.2	Modern Conflicts over Forest Land and Forest Resources	242
13.3	The Life of a Tree	244
	How a Tree Grows	244
	Tree Niches	244
13.4	A Forester's View of a Forest	246
13.5	Approaches to Forest Management	246
	Clear-Cutting	246
	Experimental Tests of Clear-Cutting	247
	Plantation Forestry	248
13.6	Sustainable Forestry	248
	What Is Forest Sustainability?	248
	Certification of Forest Practices	248
13.7	A Global Perspective on Forests	249
	World Forest Area, Global Production, and Consumption of Forest Resources	250
13.8	Deforestation: A Global Dilemma	252
	History of Deforestation	252
	Causes of Deforestation	253
	The World Firewood Shortage	253
	Indirect Deforestation	253
	A Closer Look 13.1 Community Forestry	254
13.9	Parks, Nature, Preserves, and Wilderness	254
	Parks and Preserves as Islands	254
	A Closer Look 13.2 A Brief History of Parks	255
	Conflicts in Managing Parks	256
	How Much Land Should Be in Parks?	256
	Conserving Wilderness	256
	Conflicts in Managing Wilderness	258
	Summary	258
	Critical Thinking Issue How Does Fragmentation of Tropical Forests Contribute to Habitat Destruction?	259
	REEXAMINING THEMES AND ISSUES	260
	KEY TERMS	260
	STUDY QUESTIONS	260
	FURTHER READING	261

Wildlife, Fisheries, and Endangered Species 262

	Case Study A Story of Three Geese	263
14.1	Introduction	265
14.2	Traditional Single-Wildlife Management	265
	A Closer Look 14.1 Reasons for the Conservation of Endangered Species (and All Life on Earth)	266
	More about the Logistic Growth Curve	267
	An Example of Problems with the Logistic Curve	269
14.3	Stories Told by the Grizzly Bear and the Bison: Wildlife Management Questions that Require New Approaches	269
	The Grizzly Bear	269
	The American Bison	270
14.4	Improved Approaches to Wildlife Management	272

	Time Series and Historical Range of Variation	272
	Age Structure as Useful Information	272
	Harvests as an Estimate of Numbers	273
14.5	Fisheries	274
	A Closer Look 14.2 Conservation of Whales and Other Marine Mammals	275
	The Decline of Fish Populations	278
	Can Fishing Ever Be Sustainable?	280
14.6	The Current Status of Endangered Species	282
14.7	How a Species Becomes Endangered and Extinct	283
14.8	How People Cause Extinctions and Affect Biological Diversity	283
	The Good News: Species Whose Status Has Improved	283
	A Closer Look 14.3 Causes of Extinction	286
	Can a Species Be Too Abundant? If So, What Do We Do?	286
14.9	The Kirtland's Warbler and Environmental Change	287
14.10	Ecological Islands and Endangered Species	288
14.11	Using Spatial Relationships to Conserve Endangered Species	289
	Summary	289
	Critical Thinking Issue Should Wolves Be Reestablished in the Adirondack Park?	290
	REEXAMINING THEMES AND ISSUES	291
	KEY TERMS	292
	STUDY QUESTIONS	292
	FURTHER READING	293

Environmental Health, Pollution, and Toxicology 294

	Case Study Demasculinization and Feminization of Frogs in the Environment	295
15.1	Some Basics	296
	Terminology	297
	Measuring the Amount of Pollution	298
15.2	Categories of Pollutants	298
	Infectious Agents	298
	A Closer Look 15.1 Sudbury Smelters: A Point Source	299
	Toxic Heavy Metals	300
	Organic Compounds	302
	A Closer Look 15.2 Mercury and Minamata, Japan	303
	A Closer Look 15.3 Dioxin: The Big Unknown	304
	Radiation	306
	Thermal Pollution	306
	Particulates	307
	Asbestos	307
	Electromagnetic Fields	308
	Noise Pollution	308
	Voluntary Exposure	309
15.3	General Effects of Pollutants	309
	Concept of Dose and Response	310
	Ecological Gradients	313
15.4	Risk Assessment	313

15.5 • Precautionary Principle 314
Critical Thinking Issue • Is Lead in the Urban Environment Contributing to Antisocial Behavior? 315

Summary 316

REEXAMINING THEMES AND ISSUES 316 • KEY TERMS 317

STUDY QUESTIONS 318 • FURTHER READING 318

16 *Energy: Some Basics* 319

Case Study • National Energy Policy: From Coast-to-Coast Energy Crisis to Promoting Energy Independence 320

16.1 • Outlook for Energy 321

Energy Crises in Ancient Greece and Rome 321

Energy Today and Tomorrow 322

16.2 • Energy Basics 322

16.3 • Energy Efficiency 324

A Closer Look 16.1 • Energy Units 325

16.4 • Energy Sources and Consumption 326

Fossil Fuels and Alternative Energy Sources 326

Energy Consumption in the United States Today 326

16.5 • Energy Conservation, Increased Efficiency, and Cogeneration 327

Building Design 328

Industrial Energy 329

Automobile Design 329

Values, Choices, and Energy Conservation 329

16.6 • Energy Policy 329

Hard Path versus Soft Path 329

Energy for Tomorrow 331

Integrated, Sustainable Energy Management 332

A Closer Look 16.2 • Micropower 333

Summary 333

Critical Thinking Issue • Is There Enough Energy to Go Around? 334

REEXAMINING THEMES AND ISSUES 334 • KEY TERMS 335

STUDY QUESTIONS 335 • FURTHER READING 336

17 *Fossil Fuels and the Environment* 337

Case Study • Sport-Utility Vehicles (SUVs): A Fuelish Trend 338

17.1 • Fossil Fuels 339

17.2 • Crude Oil and Natural Gas 339

Petroleum Production 340

Oil in the Twenty-First Century 340

Natural Gas 342

Coal-Bed Methane 342

Methane Hydrates 343

Environmental Effects of Oil and Natural Gas 344

A Closer Look 17.1 • The Arctic National Wildlife Refuge: To Drill or Not to Drill 345

17.3 • Coal 347

Coal Mining and the Environment 348

A Closer Look 17.2 • The Trapper Mine 350

Transport of Coal 352

The Future of Coal 352

Allowance Trading 353

17.4 • Oil Shale and Tar Sands 353

Oil Shale 353

Critical Thinking Issue • Should the Gasoline Tax Be Raised? 354

Tar Sands 355

Summary 355

REEXAMINING THEMES AND ISSUES 356 • KEY TERMS 356

STUDY QUESTIONS 356 • FURTHER READING 357

18 *Alternative Energy and the Environment* 358

Case Study • Pamplona—Bullish on Wind Power 359

18.1 • Introduction to Alternative Energy Sources 359

18.2 • Solar Energy 361

Solar Collectors 362

Photovoltaics 363

Power Towers 365

Luz Solar Electric-Generating System 365

Solar Ponds 365

Ocean Thermal Conversion 365

Solar Energy and the Environment 367

18.3 • Hydrogen 367

18.4 • Water Power 367

A Closer Look 18.1 • Fuel Cells—An Attractive Alternative 368

Small-Scale Systems 368

Water Power and the Environment 369

18.5 • Tidal Power 370

18.6 • Wind Power 370

Basics of Wind Power 370

Wind Power and the Environment 372

Future of Wind Power 372

18.7 • Biomass Energy 373

Sources of Biomass Energy 373

Biomass Energy and the Environment 374

Future of Biomass Energy 374

18.8 • Geothermal Energy 374

Geothermal Systems 375

Geothermal Energy and the Environment 376

Future of Geothermal Energy 376

18.9 • Policy Issues 376

Summary 376

Critical Thinking Issue • How Can We Evaluate Alternative Energy Sources? 377

Nuclear Energy and the Environment 380

Case Study • Nuclear Energy and Public Opinion 381

19.1 Nuclear Energy 381

Fission Reactors 382

A Closer Look 19.1 • Radioactive Decay 383

Sustainability and Nuclear Power 386

Pebble-Bed Reactors 387

Fusion Reactors 387

19.2 Nuclear Energy and the Environment 389

Problems with Nuclear Power 389

A Closer Look 19.2 • Radiation Units and Doses 391

Effects of Radioisotopes 393

Radiation Doses and Health 394

19.3 • Nuclear Power Plant Accidents 395

Three Mile Island 395

Chernobyl 396

19.4 Radioactive Waste Management 397

Low-Level Radioactive Waste 397

Transuranic Waste 398

High-Level Radioactive Waste 398

19.5 • The Future of Nuclear Energy 399

Summary 400

Critical Thinking Issue • What Is the Future of Nuclear Energy? 401

REEXAMINING THEMES AND ISSUES 402 • KEY TERMS 403

STUDY QUESTIONS 403 • FURTHER READING 403

Water Supply, Use, and Management 404

Case Study • Removal of a Dam: A Maine Experience 405

20.1 • Water 406

A Brief Global Perspective 406

Groundwater and Streams 408

Interactions between Surface Water and Groundwater 408

20.2 • Water Supply: A U.S. Example 409

Precipitation and Runoff Patterns 411

Droughts 411

Groundwater Use and Problems 411

Desalination as a Water Source 412

20.3 • Water Use 412

Transport of Water 412

Some Trends in Water Use 414

20.4 • Water Conservation 414

Agricultural Use 415

Domestic Use 415

A Closer Look 20.1 • Water Supplies for Many Urban Areas in the United States Are in Trouble 417

Industry and Manufacturing Use 417

Perception and Water Use 417

20.5 • Sustainability and Water Management 418

Sustainable Water Use 418

Groundwater Sustainability 418

Water Management 418

A Master Plan for Water Management 418

Water Management and the Environment 419

20.6 • Wetlands 419

Natural Service Functions of Wetlands 420

Restoration of Wetlands 421

20.7 • Dams and the Environment 422

A Closer Look 20.2 • Three Gorges Dam 423

Canals 423

Removal of Dams 424

20.8 • Channelization and the Environment 424

20.9 • Flooding 426

Urbanization and Flooding 426

Adjustments to the Flood Hazard 427

20.10 • The Colorado River: Water Resources Management and Environment 428

20.11 • Global Water Shortage Linked to Food Supply 431

Summary 431

Critical Thinking Issue • How Wet Is a Wetland? 432

REEXAMINING THEMES AND ISSUES 433 • KEY TERMS 434

STUDY QUESTIONS 434 • FURTHER READING 434

Water Pollution and Treatment 435

Case Study • North Carolina's Bay of Pigs 436

21.1 • Water Pollution 437

21.2 • Biochemical Oxygen Demand (BOD) 439

21.3 • Waterborne Disease 440

Outbreak in Milwaukee, Wisconsin 441

Fecal Coliform Bacteria 441

Outbreak in Walkerton, Ontario 442

21.4 • Nutrients 442

Medical Lake: An Example 442

Eutrophication 443

21.5 • Oil 444

A Closer Look 21.1 • Cultural Eutrophication in the Gulf of Mexico 445

Exxon Valdez: Prince William Sound, Alaska 445

Jessica: Galapagos Islands 447

21.6 • Sediments 447

21.7 • Acid Mine Drainage 448

21.8 • Surface Water Pollution 449

21.9 • Groundwater Pollution 450

Principles of Groundwater Pollution: An Example 450

A Closer Look 21.2 • Water for Domestic Use: How Safe Is It? 451

Long Island, New York 452
21.10 * Wastewater Treatment 453
Septic-Tank Disposal Systems 453
Wastewater Treatment Plants 454

A Closer Look 21.3 * Boston Harbor: Cleaning Up a National Treasure 456

21.11 * Land Application of Wastewater 456
The Wastewater Renovation and Conservation Cycle 456
Wastewater and Wetlands 457

21.12 * Water Reuse 460

21.13 * Water Pollution and Environmental Law 460
Summary 461

Critical Thinking Issue * How Can Polluted Waters Be Restored? 462

REEXAMINING THEMES AND ISSUES 463 * KEY TERMS 464

STUDY QUESTIONS 464 * FURTHER READING 465

The Atmosphere, Climate, and Global Warming 466

Case Study * Global Warming and the Polar Bears of Hudson Bay 467

22.1 * The Atmosphere 467

Composition of the Atmosphere 467

Structure of the Atmosphere 468

Atmospheric Processes: Temperature, Pressure, and Global Zones of High and Low Pressure 468

Processes that Remove Materials from the Atmosphere 470

22.2 * Climate 470

Climatic Change 471

22.3 * Earth System Science and Global Change 474

Geologic Record 474

Real-Time Monitoring 475

Mathematical Models 475

A Closer Look 22.1 * Monitoring of Atmospheric Carbon Dioxide Concentrations 476

22.4 * Global Warming: Earth's Energy Balance and the Greenhouse Effect 477

Electromagnetic Radiation and Earth's Energy Balance 477

The Greenhouse Effect 478

How the Greenhouse Effect Works 479

Changes in Greenhouse Gases 481

22.5 * Science of Global Warming 484

Negative and Positive Feedbacks 484

Solar Forcing 486

Aerosols and Volcanic Forcing 486

El Niño 486

A Closer Look 22.2 * El Niño 487

Methane Forcing 488

Anthropogenic Forcing from Greenhouse Gases 488

22.6 * Potential Effects of Global Warming 488

Changes in Climate 489

Rise in Sea Level 491

Changes in Biosphere 492

22.7 * Adjustments to Potential Global Warming 494

Living with Global Change 496

Mitigating Global Warming 496

Summary 498

Critical Thinking Issue * Should the Precautionary Principle Be Applied to Global Warming? 499

REEXAMINING THEMES AND ISSUES 500 * KEY TERMS 501

STUDY QUESTIONS 501 * FURTHER READING 501

23 *Air Pollution 502*

Case Study * London Smog and Indonesian Fires 503

23.1 * A Brief History of Air Pollution 504

23.2 * Stationary and Mobile Sources of Air Pollution 505

23.3 * General Effects of Air Pollution 506

23.4 * Primary and Secondary Pollutants, Natural and Human 508

23.5 * Major Air Pollutants: Some Details 508

Sulfur Dioxide 508

Nitrogen Oxides 509

Carbon Monoxide 509

Ozone and Other Photochemical Oxidants 510

Volatile Organic Compounds 510

Particulate Matter (PM 10 and PM 2.5) 510

Hydrogen Sulfide 512

Hydrogen Fluoride 512

Other Hazardous Gases 512

Lead 512

A Closer Look 23.1 * Acid Rain 513

23.6 * Variability of Air Pollution 517

Las Vegas: Particulates 517

Haze from Afar 517

23.7 * Urban Air Pollution 518

Influences of Meteorology and Topography 518

Potential for Urban Air Pollution 519

Smog 520

Future Trends for Urban Areas 521

23.8 * Pollution Control 523

Pollution Control: Particulates 523

Pollution Control: Automobiles 523

Pollution Control: Sulfur Dioxide 524

23.9 * Air Pollution Legislation and Standards 525

Clean Air Act Amendments of 1990 525

Ambient Air Quality Standards 525

23.10 * Cost of Air Pollution Control 528

Summary 528

Critical Thinking Issue * Where Does Arctic Haze Come From, and How Does it Affect the Environment? 529

REEXAMINING THEMES AND ISSUES 531 * KEY TERMS 531

STUDY QUESTIONS 532 * FURTHER READING 532

24 *Indoor Air Pollution 533*

Case Study * Massachusetts Registry of Motor Vehicles Building: Sick Building Syndrome 534

24.1	Sources of Indoor Air Pollution	535
24.2	Heating, Ventilation, and Air-Conditioning Systems	538
24.3	Pathways, Processes, and Driving Forces	538
24.4	Building Occupants	539
	Particularly Susceptible People	539
	Symptoms of Indoor Air Pollution	539
