# THE CHANGING OCEAN

Its effects on climate  
and living resources

Bruno Voituriez

# Contents

- **CHAPTER 1 A brief history of oceanography** **13**
- Oceano-geography
  - The birth of oceanography: the major national scientific expeditions
  - International co-operation: from the International Geophysical Year to the World Climate Research Programme and the International Geosphere–Biosphere Programme
  - From oceanography to oceanology: dynamical oceanography
- **CHAPTER 2 Driving forces of the ocean currents** **27**
- Solar energy
  - Earth's rotation and Coriolis force
  - Ocean–atmosphere interaction
  - The geostrophic hypothesis
  - Major subtropical anticyclonic circulations
  - Undulations of the thermocline, convergence and divergence
  - Oceanic gyres
- **CHAPTER 3 Oceanic variations, climatic variations** **43**
- Variation in the climate system
  - Dynamical factors: the atmosphere and the ocean
  - Interannual variability: the El Niño phenomenon
  - Decadal variations: the NAO
  - Long-term climate change: the thermohaline circulation
  - A new factor in the climate: humanity. The ocean and carbon dioxide
  - Reducing the uncertainties
- **CHAPTER 4 Ecosystem dynamics** **69**
- Primary production
  - Marine meadows
  - Factors limiting primary production
  - Marine ‘deserts’ in the centre of major oceanic gyres
  - Coastal upwelling
  - The equatorial singularity
  - Spring bloom: the example of the North Atlantic
  - Antarctic divergence and the HNLC paradox
  - Undulations of the thermocline–nutricline in the tropical environment
  - Meso-scale perturbations: eddies, nutrient pumps

→	<b>CHAPTER 5</b>	<b>Climate variation and fish</b>	<b>93</b>
		Ambiguities of fishery research: creation of the International Council for the Exploration of the Sea	
		Lessons of the collapse of the Newfoundland cod stock	
		The ecosystem approach	
		The anchovy, the sardine and El Niño	
		From guano to fishmeal: the California sardine, a victim of the war?	
		Synchrony of catches in the Pacific	
		The Alaska salmon	
		Pacific decadal oscillation	
		Cyclonic circulation of the Gulf of Alaska	
		The anchovy, the sardine and coastal upwelling	
		The anchovy and the sardine of the Kuroshio	
		The herring of the North Atlantic: the collapse of the 1960s–1970s	
		The herring, the sardine and climate oscillation in the North Atlantic	
		Bluefin tuna in the Mediterranean	
		Regime changes	
→	<b>CHAPTER 6</b>	<b>See, observe, measure and model, to understand and forecast</b>	<b>125</b>
		Modelling: experimentation and forecast	
		Modelling of ocean dynamics	
		Observation of the ocean in situ	
		The space revolution: the ocean in all its moods	
		Towards operational oceanography. A crucial experiment: GODAE (2003–05)	
		<b>Conclusion</b>	<b>143</b>
		<b>Glossary</b>	<b>147</b>
		<b>Further reading</b>	<b>169</b>
		<b>Annex</b>	<b>171</b>
