List of Figures

1.1. An organizational–institutional approach to turbulent governance	13
3.1. An illustration of turbulence of scale	68
9.1. Complexity and diversity	205
9.2. Sources of turbulence for local municipalities as a decision-making system	206
9.3. Three kinds of turbulence and problem situations/ responsibilities of middle managers	208
10.1. Graphs by year for male marital premium (population level), female penalty (population and occupation-establishment levels), and motherhood penalty for 3+ children (population and occupation-establishment levels)	234
11.1. Reliability space and precursor zone	250
12.1. Mess and reliability space of professional activities	265

List of Tables

2.1. Modes of governance: pure (PMG) and hybrids (HMG)	32
3.1. Key variations between the MLG and the MLA approach	62
4.1. Two conceptions of resilience	87
5.1. The wicked problems framework	110
5.2. Unruly problems	127
6.1. Dimensions of intraministerial coordination	140
6.2. Organizational responses to the crisis and ongoing turbulence	151
7.1. Percent of agency officials who report that national agencies practice laws and rules that originate from EU decisions within their own issue area	173
7.2. Percent of agency officials reporting that the following institutions and actors are <i>important</i> with respect to influencing national agencies' practicing of EU "hard law"	174
8.1. US government agencies' contractor personnel in Iraq and Afghanistan as of March 2010	186
8.2. US military and contractor fatalities in Afghanistan and Iraq	187
8.3. Geographical split of ICoC signatory companies on September 1, 2013	188
9.1. Different problem situations and middle managers' response to whether they have faced the situation	211
9.2. Different problem situations and middle managers' average use of resources when they seek to solve them	214
9.3. Average use of the six different resources	215
9.4. Multiple response analysis of problem situation, problem-solving resources, and resources involved	217
10.1. Wage penalties of children for women by year	232
11.1. Classic HRO vs networked (resilient) model of high reliability	249
