Intellectual Property Rights

Legal and Economic Challenges for Development

EDITED BY

MARIO CIMOLI, GIOVANNI DOSI,
KEITH E. MASKUS, RUTH L. OKEDIJI,
JEROME H. REICHMAN,
AND JOSEPH E. STIGLITZ

The Initiative for Policy Dialogue Series

Contents

<i>List of Figures and Graphs</i>	vii
<i>List of Tables</i>	viii
<i>List of Contributors</i>	ix
1. The Role of Intellectual Property Rights in the Development Process, with Some Lessons from Developed Countries: An Introduction	i
<i>Giovanni Dosi and Joseph E. Stiglitz</i>	
Part I: IPR, Innovation and Development: Economic History and Theory	
2. Innovation, Technical Change, and Patents in the Development Process: A Long-Term View	57
<i>Mario Cimoli, Giovanni Dosi, Roberto Mazzoleni and Bhaven N. Sampat</i>	
3. Lessons from the Economics Literature on the Likely Consequences of International Harmonization of IPR Protection	89
<i>Albert G.Z. Hu and Adam B. Jaffe</i>	
4. Intellectual Property in the Twenty-First Century: Will the Developing Countries Lead or Follow?	111
<i>Jerome H. Reichman</i>	
Part II: Knowledge Appropriation and Development	
5. Ethical Incentives for Innovation	185
<i>Sarah Chan, John Harris, and John Sulston</i>	
6. Is Bayh-Dole Good for Developing Countries? Lessons from the U.S. Experience	201
<i>Anthony D. So, Bhaven N. Sampat, Arti K. Rai, Robert Cook-Deegan, Jerome H. Reichman, Robert Weissman, and Amy Kapczynski</i>	
Part III: Experiences from Public Health, Agriculture, and Green Technology	
7. IPRs, Public Health and the Pharmaceutical Industry: Issues in the Post-2005 TRIPS Agenda	219
<i>Benjamin Coriat and Luigi Orsenigo</i>	

8. Innovation, Appropriability and Productivity Growth in Agriculture: A Broad Historical Viewpoint <i>Alessandro Nuvolari and Valentina Tartari</i>	242
9. The Distributive Impact of Intellectual Property Regimes: A Report from the “Natural Experiment” of the Green Revolution <i>Timothy Swanson and Timo Goeschl</i>	264
10. International Efforts to Pool and Conserve Crop Genetic Resources in Times of Radical Legal Change <i>Michael Halewood</i>	288
11. Mode of Entry for Emerging Markets: An <i>ex ante</i> and <i>ex post</i> Perspective of the Open Source Development and Management of Biotechnology Knowledge Assets <i>Minna Allarakhia</i>	323
12. Intellectual Property and Alternatives: Strategies for Green Innovation <i>Jerome H. Reichman, Arti K. Rai, Richard G. Newell, and Jonathan B. Wiener</i>	356
13. Legal and Economic Perspectives on International Technology Transfer in Environmentally Sound Technologies <i>Keith E. Maskus and Ruth L. Okediji</i>	392
Part IV: Challenges for Governance and Policymaking	
14. Multilateral Agreements and Policy Opportunities <i>Carlos M. Correa</i>	417
15. Preferential Trade Agreements and Intellectual Property Rights <i>Pedro Roffe and Christoph Spennemann</i>	439
16. Industrial Policy and IPR: A Knowledge Governance Approach <i>Leonardo Burlamaqui and Mario Cimoli</i>	477
Part V: Conclusion	
17. The Role of Intellectual Property Rights in Developing Countries: Some Conclusions <i>Mario Cimoli, Giovanni Dosi, Keith E. Maskus, Ruth L. Okediji, Jerome H. Reichman and Joseph E. Stiglitz</i>	503
<i>Index</i>	515

List of Figures and Graphs

Figure 7.1 The impact of switching to second-line regimens on the price of ARV treatment	232
Figures 9.1–9.4 A graphical representation of the procedure for the cases of maize, sorghum, wheat and rice	269
Figure 9.5 Impact of strong IPR regime in developed countries	280
Figure 9.6 Impact of strong IPR regime in developing countries (China)	281
Figure 9.7 Impact of strong IPR regime in developing countries (Ethiopia)	282
Figure 9.8 Impact of strong IPR regimes in developing countries (Tanzania)	283
Figure 11.1 Open-source-based model and mode of entry options	336
Figure 11.2 Impact of IPR management on entry options	337
Figure 11.3 The Brazil ONSA network <i>ex ante</i> open innovation strategy	340
Figure 11.4 The India OSDD <i>ex ante</i> open-source drug discovery strategy	343
Figure 11.5 The CAMBRIA BiOS <i>ex post</i> intellectual property right management strategy	345
Figure 12.1 Cumulative global mitigation costs under alternative technology scenarios	359
Figure 12.2 All sector patents by quarter 2002–2008	368
Figure 16.1 The “intensity” and “time consistency” of knowledge governance	495
Graph 16.1 The knowledge curve: production structure specialization and patenting	479
Graph 16.2 Accumulation of technological capabilities and IPR: Evolutionary vs. Orthodox perspective	482
Graph 16.3 A virtuous and vicious development of the production structure and IPR	483

List of Tables

Table 1.1	Effectiveness of appropriability mechanism in product and process innovations, 1983 and 1994	22
Table 1.2	Comparing alternative systems	30
Table 1.3	Costs of first and second line HIV treatments in Western and developing countries	35
Table 2.1	Changes in IP protection in developing and emerging countries	78
Table 8.1	The historical evolution of intellectual property protection for biological inventions	255
Table 9.1	Acreage, global distribution, growth, and relative yield gap in eight major crops	267
Table 9.2	Regressions for convergence of crop yields, 1961–1999	268
Table 9.3	Regressions for diffusion of innovations in different crops	273
Table 9.4	Projected rates of convergence (i.e. remaining yield-gaps) after specified number of years for specified crops	274
Table 9.5	Regressions for diffusion of innovations in different crops	278
Table 10.1	PGRFA from other regions accessed through the CGIAR gene banks, 1980–2000	292
Table 10.2	Countries' dependence on foreign rice germ plasm	293
Table 11.1	Comparing <i>ex ante</i> and <i>ex post</i> knowledge management strategies	346
Table 11.2	Managing open-source-based innovation	348
Table 11.3	Future policy recommendations	350
Table 14.1	TRIPS flexibilities: For what purposes?	418
Table 14.2	Flexibilities regarding patentability criteria and claims' coverage	419
Table 14.3	Flexibilities about patentable subject matter	424
Table 14.4	Flexibilities regarding research and product approvals	426
Table 14.5	Protection of test data	428
Table 16.1	Importance of technology-intensive sectors (exports shares and shares in total manufactures) and IPR	481
Table 16.2	SDT, flexibilities, and self-determination provisions: A taxonomy of TRIPS' (effective) degrees of freedom for policies	488
